

DH-AS5500-48GT4XF-600

System Overview

Dahua AS5500 Switch Series are high performance Gigabit Ethernet switches with full L2 and L2+ features, enterprise-level Quality of Service (QoS), enhanced security control and a bundle of ISP features.

Functions

Intelligent Resilient Framework 2 (IRF2)

IRF2 is the stacking technology used in conjunction with the spare ports on the panel. It offers the flexibility to stack over longer distances, such as hundreds of meters across buildings or several kilometers between sites, using long-range transceivers.

Enterprise-level Connectivity

For connectivity, fixed 1U models are offered and are ideal for branch offices or small to large enterprise environments. Each switch includes four high-speed built-in 10GbE uplinks for non-blocking transmission. PoE models can carry up to 600W to power end devices.

Powerful L2 and L3 Features

This series supports a large range of L2 features such as 802.1Q VLAN, Port Mirroring, STP/RSTP/MSTP, Link Aggregation Control Protocol, and the 802.3x Flow Control function. It also supports multiple L3 features, including OSPF and RIP, addressing enterprise access and aggregation service demands.

Scene

It can meet the needs of digital transformation and network construction, and is ideal for small and medium-sized enterprises, chain businesses, branches, the government, schools and hotels.

- Powerful L2 and L3 Features
- Enterprise-level Connectivity
- Intelligent Resilient Framework 2 (IRF2)
